Taste

- Manna is providing a Shilajit and Dead Sea Ormus that tastes amazing. On there on they taste very earthy because they are so concentrated and packed with nutrients. We have made them taste exulted and so the Shilajit resin can be added to other preparations for the first time without overpowering them. When Manna is added to other vitamin or mineral preparations the energetic properties of the entire vitamin or mineral preparation are enhanced!

Resonant technology

- we have developed in-house vortex and magnetic technology to structure and modulate our Ormus molecules. This allows the receptors on the cells to accept the Manna product as the molecules have correct geometry and electrical potential (passcode) to enter. This improves the Vitality and Resilience of our cells through appropriate nutrient absorption and removal of wastes. It also gives us a clearer interface with our Pristine blueprint and the Unified Field.

**If your going to take just one supplement this is it
Manna will simplify your life**
